LIVE
SIMULATE
PREDICT

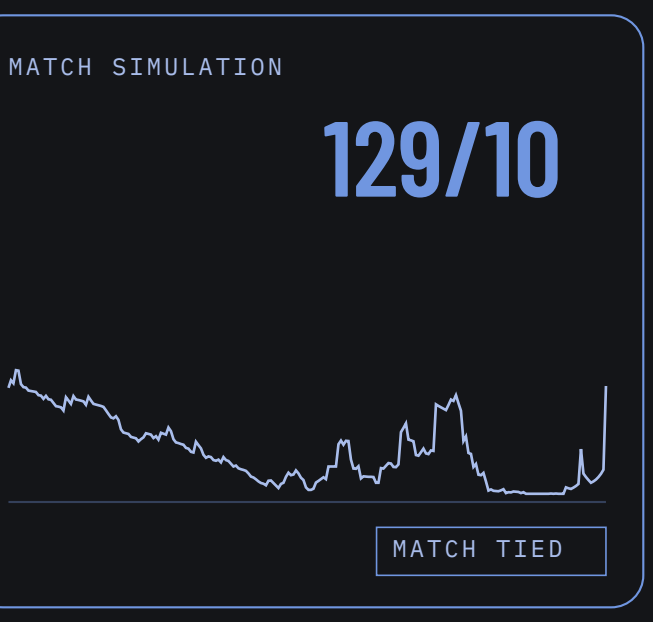

A battery-powered box that follows live IPL matches, plays new ones ball by ball and works out who is likely to win after every delivery.

All of it runs on an Arduino UNO Q. A 2.8-inch touch screen shows the score, overs left and the win chance; any phone on its Wi-Fi gets the dashboard.

CRICKET

ON A SMALL BOARD.

Join the Wi-Fi UCIS-Cricket and open 10.42.0.1:8000 on your phone.
