UCIS

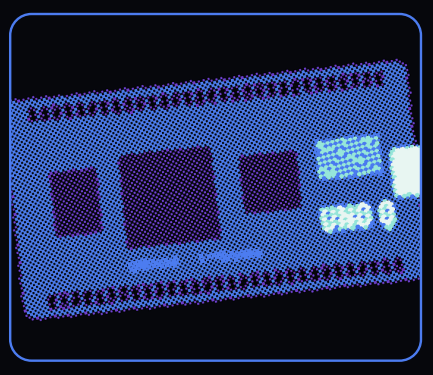

UNIFIED CRICKET INTELLIGENCE SYSTEM

LIVE
SIMULATE
PREDICT

CYD · ESP32 TOUCH

ARDUINO UNO Q · THE HUB

A battery-powered IoT box that follows live IPL scores, plays matches ball by ball and predicts the winner after every delivery. All of it runs on one Arduino UNO Q.

LIVE

IPL scores from CricketData.org, two calls under the free 100 a day.

SIMULATE

Pick two IPL teams; the board bowls every ball itself.

PREDICT

Win chance after each ball, held between 3% and 97%.

MI WIN CHANCE · BALL BY BALL

129/10

MATCH TIED

HOW IT CONNECTS

NO PC AT RUNTIME. THE BOARD IS THE HUB AND THE HOTSPOT.

THE SIMULATED MATCH

240
BALLS BOWLED

129
RUNS EACH SIDE

3–97%
WIN CHANCE RANGE

ONE BAR PER BALL · MI v CSK · SEED 25

STATUS

+ Scoring engine — working
+ Match simulation — working
+ Win chance — working
+ Live feed (API) — working
– Wireless CYD link — planned
– Android app — planned
